

CREATING THE FUTURE

Biomed Forum 2015: 8 - 10 December
Shine Dome, Australian Academy of Science, Canberra

This year marks the 4th year since the birth of CUBENet and VIBENet. Following on from our discussions at the last Shine Dome meeting and with the support of the Australian Academy of Science we are now combining to officially launch BEAN – our Bioscience Education Australia Network. This new umbrella network provides a platform to tackle together the challenges and opportunities that we face in the ever evolving tertiary landscape. It also builds the critical mass that allows us to engage more broadly with our partners in other disciplinary areas.

The Forum will go over 3 days.

Day 1 (Dec 8) will be the official launch of BEAN with a stellar cast of speakers around the themes of creative engagement and communication. These people are here to share their expertise and skills with you.

Day 2 (December 9) will focus on CUBE and VIBE activities with updates and presentations from network members. It will also include 3 “unpacking the TLOs” sessions around critical thinking, communication, assessment and quantitative skills.

On Day 3 (December 10) will be the Mathbench day with a host of international and national speakers.

We look forward to welcoming you and your colleagues to this exciting new chapter in biosciences education in Australia.

Phil Poronnik and Pauline Ross

INTRODUCING...

BEAN

Biosciences Education
Australia Network

SPEAKERS:

Bruce Ramus
Simon Betts
Emma Johnston
Jon McCormack
Ollie Bown
Chris Hammang
Luke Russell
Luke Menzies
Caitilin de Berigny
Peter Adams
Louise Kuchel
Jenny Koenig
Kaci Thompson
Hugh Possingham
Ramesh Rajan
Kelly Matthews
Deborah Jackson
Fiona Bird
