

# Closing the loop

## *CUBEnet and the future of biomedical education*

**12-13 December 2013**

Shine Dome, Australian Academy of Science, Canberra

CUBEnet - the Collaborative Universities Biomedical Education Network - is holding its third National Forum to present and discuss the achievements of the network since its launch in December 2011 and to consider future activities.

The Friday afternoon session will feature progress reports from the working groups and CUBEnet members and a poster session. Attendees will also hear from exciting national and international speakers about emerging issues facing biomedical education in a higher education sector under challenge from regulation and “disruptive” innovation.

This is an important opportunity to join your colleagues to exchange ideas and help in developing a strategic vision for the next phase in the work of CUBEnet. We look forward to your participation and input at what will be an important and productive forum.
